

Anti-Corrosion • Anti-Rust • Anti-Mold & Mildew

Intercept Technology™

...Simply Better Protection

Intercept delivers better protection PLUS saves time and money:

OLD METHOD:

- 5 Process Steps
- Expensive Air Handling Equipment
- 4 Materials
- Total Pack Time: **25 minutes**

INTERCEPT METHOD:

- 1 Process Step
- No Air Handling Equipment
- 1 Material
- Total Pack Time: **5 Seconds**
- ▶ **ZERO REJECTIONS** in 12+ years of use

Switching to Intercept Provides:

- Better Protection
- Increased Productivity
- Reusable Packaging (additional quality assessments)
- Increase in worker safety
- Elimination of packing station equipment

Problem:

An American aerospace part manufacturer was moving facilities. Their packaging process required the use and application of a spray-on preservative. This required air handling equipment and exhaust ventilation at every packaging station, as well as expensive heat and vacuum sealing equipment. All would be needed for continued use of mil-B-131 foil bags.

Opportunity - Find a new Barrier Packaging Solution that would:

- Increase worker safety
- Increase productivity and efficiency
- Enable packaging re-usability
- Eliminate the need for packaging station equipment and maintenance

Solution:

Static (Corrosion Intercept Bags)
Safe, Reliable, Reusable, and Cost Efficient
